

Bryan Collons, P.E., S.E.

485 Front Street North, Suite F-3
Issaquah, WA 98027

T 425.369.1101
F 425.369.1157

Education

B.S. Civil Engineering, Washington State University, Pullman, Washington 1985

M.S. Civil Engineering, Washington State University, Pullman, Washington 1987

Professional Registration

Washington (Civil and Structural)

Oregon (Civil)

Utah (Civil)

Affiliations

American Concrete Institute

American Institute of Steel Construction

American Society of Civil Engineers

Post-tensioning Institute

Structural Engineers Association of Washington

Experience

Bryan Collons, expertise goes beyond structural engineering design and project management. His nineteen years in the industry also includes a special focus in prestressed concrete design—a skill he developed while working as a client liaison, supervisor and engineer for a West coast post-tension concrete material supplier. With more than 14 million square feet of post-tensioned slab design under his belt, Bryan provides sensible building designs, tailored to local construction practice.

In addition to his design capabilities, Bryan is also known for his supervisory abilities. Managing and motivating in-house design teams allows for prompt delivery of projects, while assuring company profitability. Bryan has also developed a proprietary project delivery system, which expedites the drawing process and allows for more time to be spent adding value to each project.
